## Load Break Disconnect Switches fsLbs

## UL 508 Non-Fused Load Break Switches

The FSLBS Load Break Switch is a newly designed industrial-grade switch capable of making or breaking loads up to 600 V . It is suitable as a motor disconnect. Extremely compact and robust, these switches have a variety of mounting options including DIN-rail, base, or door-mounting. A wide assortment of handles, shafts and accessories are available to accommodate any installation requirement. Both the toggle and rotary styles have a built-in pad-lockable hasp and the integrated box terminals are finger-safe to IP-20. Utilizing a patented, innovative design, the FSLBS can be actuated from the front or either side.

## Highlights:

- Terminals rated for 2 wires!
- Front or side operation
- Padlockable
- Compact
- Robust
- DIN-rail, base, or door- mounting
- Choice of handles and shafts
- Side-mount auxiliary contacts and additional poles
- Double-break, silver-plated contacts

## Applications:

- On/Off switching and disconnect applications in circuits up to 600 V , 80A on the load side of branch circuit protection fusing.
- Motor controller, suitable as motor disconnect
- Motor isolator
- General purpose

## Ratings:

Volts : 600VAC
Amps : 16, 25, 40, 63, and 80A

Suitable as motor disconnect up to 40hp

## Approvals:

- UL 508 listed E196672
- CSA 22.2 \#14
- IEC 60947-3

## Pre-Break Auxiliary Contacts

Mount directly to the side of the switch. The top contact is pre-break, the bottom contact makes with the switch. Up to four sets of auxiliary contacts can be added.

## Door Mounting Kit

Allows mounting of the switch to a door or side panel. Utilizing the switch's side actuation provides access to the terminal screws, enabling the wiring to be completed after installation.

## Padlocking Capabilities

Switch: With the switch in the 'Off' position, a hasp can be deployed that will lock the switch in this position.
Handle: The white lever in the center of the handle can be rotated out to reveal openings for up to 3 padlocks.
